

**Josiane Dion, MD**

Assistant Professor, University of Toronto

Medical Director, Ted Rogers Centre of Excellence in Heart Function

Medical Director, Ajmera Transplant Centre at Peter Munk Cardiac Centre

Toronto, ON

Josiane Dion is a fellow who did her internal medicine and cardiology training at Laval University in Quebec City. In July 2023, she started a two-years fellowship with the University of Alberta/Mazankowski heart institute in advanced heart failure, cardiac transplantation and mechanical support. She also has special interests in inherited cardiomyopathy and advanced heart failure in the ACHD population.

Dr. Dion also has experience as an attending member on provincial and local committees. She attended "Quebec cardiologists association" as trainee representative from 2021 to 2023 and "Quebec cardiology society" as resident representative in 2023. She was chief resident of her home-centre (IUCPQ) in 2022-2023, as part of this assignment she was also involved in medical teaching direction committee (collaborative committee between Laval University and my previous training centre), respirology program competency evaluation committee (as a neutral trainee from another program for transparency) and trainees related independent complaints management committee.

After completion of her fellowship, she will have an advanced heart failure and transplant specialist position at her home-centre, Quebec Heart and Lung Institute/IUCPQ
